

PRE-CONFERENCE WORKSHOP

CARE BUNDLES IN ICU PATIENTS HANDS-ON WORKSHOP

Department of Infectious Diseases SMBBIT, Karachi.

INTRODUCTION

Sepsis and hospital-acquired infections (HAIs) are considered major public health risks and leading causes of death in hospitalized patients. These HAIs can be preventable if addressed with bundled care processes. Therefore, this unique hands-on course will be beneficial in teaching ICU healthcare staff how to prevent hospital-associated infections in the ICU.
